With over 3 years of experience as a Software Developer, I specialize in creating exceptional user experiences and optimizing application performance. Additionally, I developed and maintained an Angular component library used across multiple projects.

PROFESSIONAL EXPERIENCE

Logical Growth S.A.S - Fianly

FrontEnd Developer

Pereira, Colombia

January 2022–currently

- Develop a unified platform of components and tools for the company's various products, technically converging and accelerating product delivery.
- Led the improvement of web performance for the company's products.
- Provided innovative solutions by implementing a technique in Angular that structures each component as an independent module, increasing code granularity and optimizing JavaScript loading by the browser when navigating between pages, reducing web load times.
- Optimized SEO, achieving significant improvements in Google metrics through strategic decision-making, such as selecting the right technology to meet objectives.
- Developed several internal projects, establishing system foundations, including session management, notifications, and the overall structure of each project.
- Develop and maintain various projects in Angular and Next.js.
- Collaborated closely with various departments in planning new features for different platforms, from gathering requirements and creating user stories and mockups to development.
- Provided guidance and support to team members in resolving development-related issues.
- Reviewed and optimized existing code, ensuring its efficiency and alignment with the company's quality standards.
- Managed technical debt by migrating the project from Angular 8 to Angular 13, optimizing and refactoring the legacy code of various platform modules, achieving a significant reduction in the application's bundle size.

Freelance

FrontEnd Developer

Remoto

May 2021–February 2022

- Developed full-fledged web applications using technologies such as HTML, CSS, JavaScript, and Angular, creating robust and scalable solutions.
- Integrated third-party APIs to add dynamic functionalities on the front end, enhancing the interactivity and responsiveness of the applications.
- Performed bug fixes, addressing technical issues and ensuring that applications and websites functioned smoothly.
